Ten Steps to Building Software Test Automation That Works; Step 10: What's Next?

Introducing New White Paper: Step by Step Guide On How To Leverage Virtual Machine Technology to Maximize the Results of Software Test Automation.

News Update: New Service Offering; Experienced US Based QA Analysts Available at \$20 Per Hour

Ten Steps to Building Software Test Automation That Works**Step 10: What's Next?**

Dear Vlad,

Over the past 10 months, we have covered each step in the "Ten Steps To Building Software Test Automation That Works" White Paper. If you followed along, you have completed all the steps below and have a successful automation solution in place. You have changed the way you do business.

If not, don't give up.

- Setting up goals and objectives
- Defining budget and ROI
- Analyzing existing QA and development processes
- Designing your test automation and transition process
- Identifying, hiring, and training automation resources
- Selecting tools
- Promoting internal sale and the automation project
- Achieving immediate results
- Measuring your progress

What can you do next to become the champion of automation rather than the testing bottleneck?

If you haven't kept up implementing each step in the 10 step process, there's an alternative. It may be difficult to find the time to get started or there may be a thousand other reasons. Maybe all you need is a little help.

A proven path to test automation in 30 days...
