Step 5: Tool Selection**Proof of Concept Service****News Update: New Service Offering... Experienced US Based QA Analysts at \$20 Per Hour****Ten Steps to Building Software Test Automation That Works***Step 5: Tool Selection**One Size (Does Not) Fit All*

Dear Vlad,

Selecting the right test automation tool for your software testing may be more difficult than you think. We can cite more than one executive who impacted his/her career or business that wasted hundreds of thousands of dollars by making the wrong choice.

Your market may have some unique requirements. For example, companies that work with medical images need to verify that its software is sending or receiving the correct image. You wouldn't want your doctor reviewing someone else's chest XRAY or MRI before an important surgery. In order to automate this testing, you need a tool that supports the verification of images. Few software automation tools have this feature.

Do your homework and improve the chance of selecting the right tool for your business. If you are considering purchasing an automation tool or have encountered issues with your current tool you may find the tool selection guide helpful.

An effective approach to getting started with test automation is the qaSignature Proof of Concept Service. Standard test automation produces limited results and is difficult and costly to maintain. The qaSignature methodology is different. We'll prove it. Give us your most difficult automation challenge. We will:

- ◆ Recommend the optimal automation tool (or use yours)
- ◆ Build the automation as a proof of concept and show you how our methodology works
- ◆ Let you change the code, we will update the test and rerun
- ◆ Show you the results in our easy to follow test logs
- ◆ Prioritize areas for automation based on results from a cost benefit analysis
- ◆ Give you a fixed price estimate for a fast start program

Here's what our clients had to say.

"The amount of automation that they were able to develop in a couple of days including fact finding was impressive. Their competition could not even begin the process without first learning the application."

Keith Hillyard, Custom Engineering SQA Manager, Kronos

"The qaSignature proof of concept is a "no brainer." They delivered much more than we expected. The process helped us map out our QA Automation Framework."

Frank F. Frazier Jr., Senior Program Manager, ZANTAZ

"The dedication, enthusiasm and passion of the qaSignature team was refreshing. I would recommend them to anyone who needs to develop QA Automation."

Paul Bradley, Systems Consultant, DAFCA Inc.

"The proof of concept demonstrated the applicability of applying the qaSignature QA Automation Methodology to our Agile Development Process."

Keith Hillyard, Custom Engineering SQA Manager, Kronos

"I was impressed by qaSignature's objectivity. They recommended the right tool for the job even though it wasn't their standard offering. They really know QA Automation."

Larry Leonard, Director of Development, SmartTime
